

DRIVER'S BEST FRIEND

[MEYLE-No.: 100 498 0637, Short no.: MDS0074]

Product of the month – MEYLE-ORIGINAL drive shaft

As DRIVER'S BEST FRIEND we offer 23,000 solutions to make vehicles around the globe perform longer and more reliably so that motorists all over the world can safely rely on MEYLE quality.

The product of the month at a glance:

- **The drive that keeps you moving:** The drive shaft transfers the power generated by the engine and transmission to the wheels and is therefore subject to heavy stress and continuous motion when steering, driving off and braking. In addition, the vehicle's compression and rebound forces act on the drive shaft joints and boots.
- **Superior quality designed to last:** To improve part durability and guarantee continued performance in this demanding operating environment, MEYLE-ORIGINAL drive shafts are made from forged steel. They run on high-performance grease specially formulated to withstand the loads and forces acting on the part and also feature highly wear-resistant boots and clamps.
- **Single-source solution:** In addition to the drive shaft assembly, MEYLE also offers the suitable mounting parts according to OE specifications, as well as the inner and outer joints (ball joints and tripod joints) thus allowing individual components to be replaced separately.
- **Catering for a wide range:** With 151 products, the range of MEYLE-ORIGINAL drive shafts caters for all popular makes and models, including Audi, Seat, Skoda and VW applications.
